

01 Site Overview

Jing-Zhang AI Innovation Belt 43.6 km²

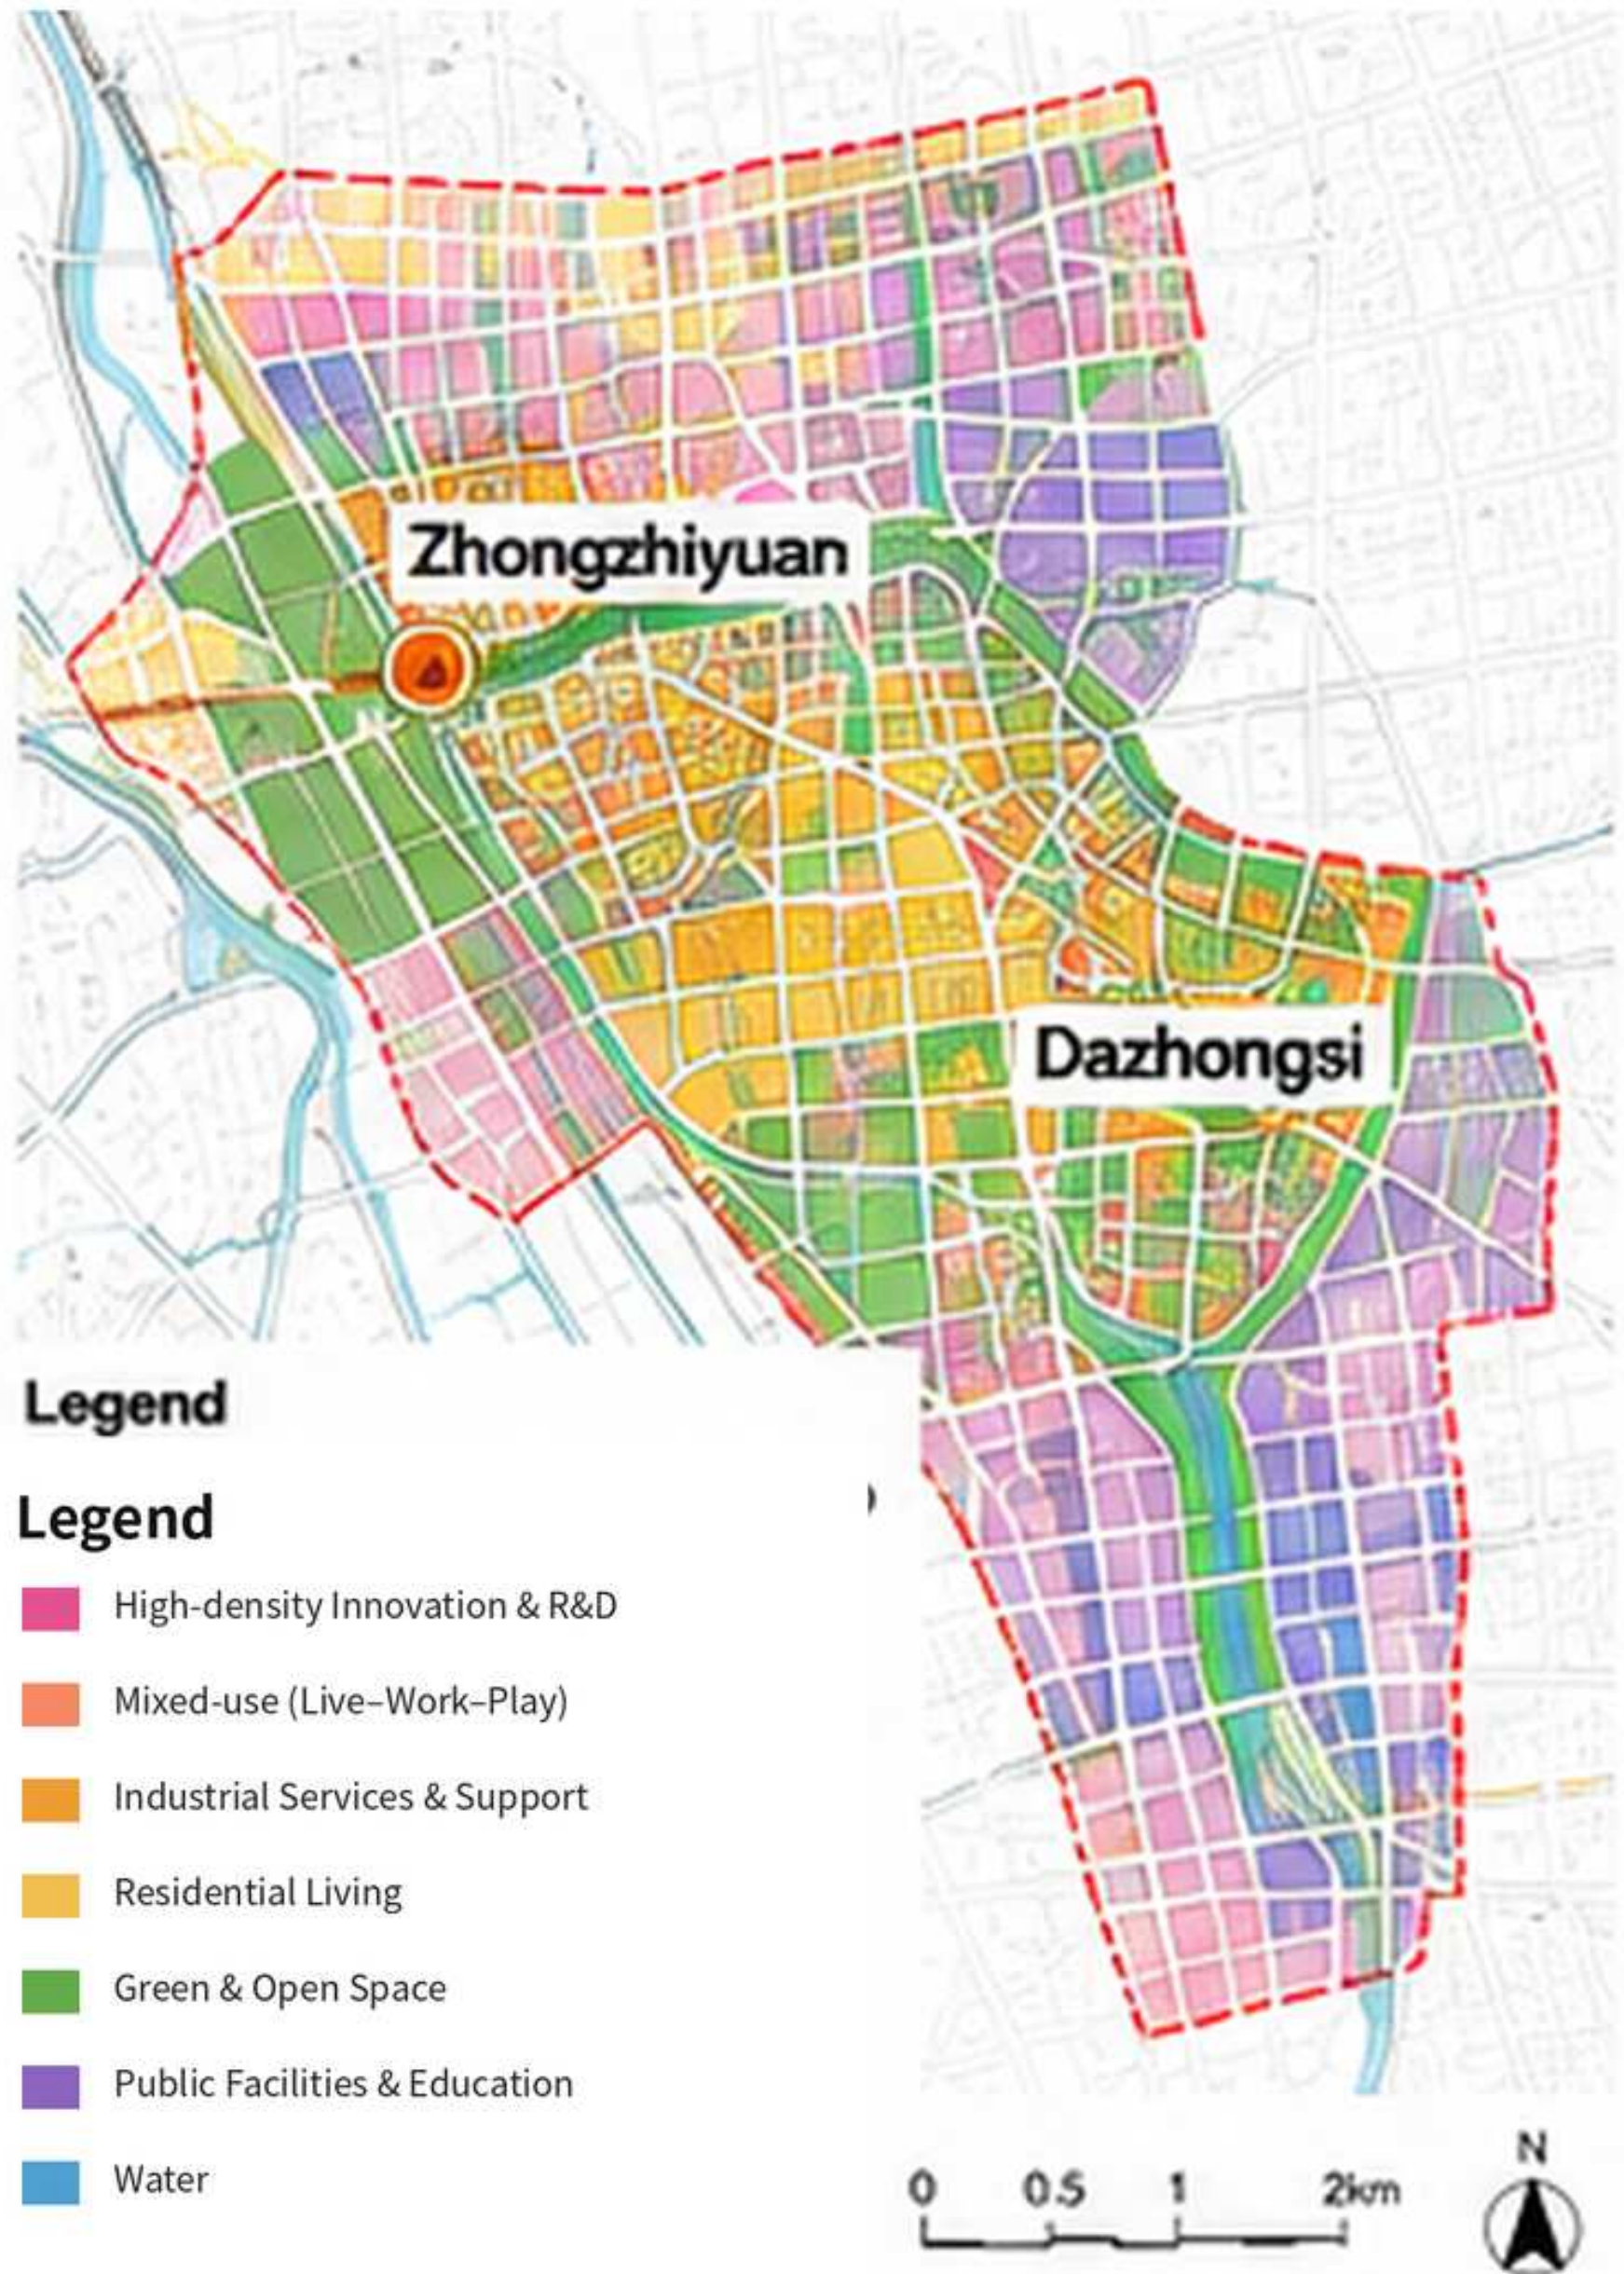

Note: provisional_rough, for conceptual urban design.

Note: provisional_rough, for conceptual urban design and research only; not an official redline or approved

02 Land Use Structure

Four Leading Function Types

Note: provisional_rough, for conceptual urban design.

Note: provisional_rough, for conceptual urban design and research only; not an official redline or approved

03 Structure of Three Key Areas

Three Roles & Spatial Structures

Zhongzhiyuan

CITY TESTBED

The Last Mile Before AI Enters the Real City

Public Front → Controlled Test Core

Prototype Transition → Limited Real-life Edge

AI Origin Community

LIVING LOAD

AI / HUMAN / OFFLINE / LOW-NO SENSING

Basic public services retain human and offline paths

Dazhongsi

RENEWAL RULE LAB

AI Renewal Unit Detailed-Planning Workbench

KEEP / ADAPT / TEMPORARY / TRIGGERED

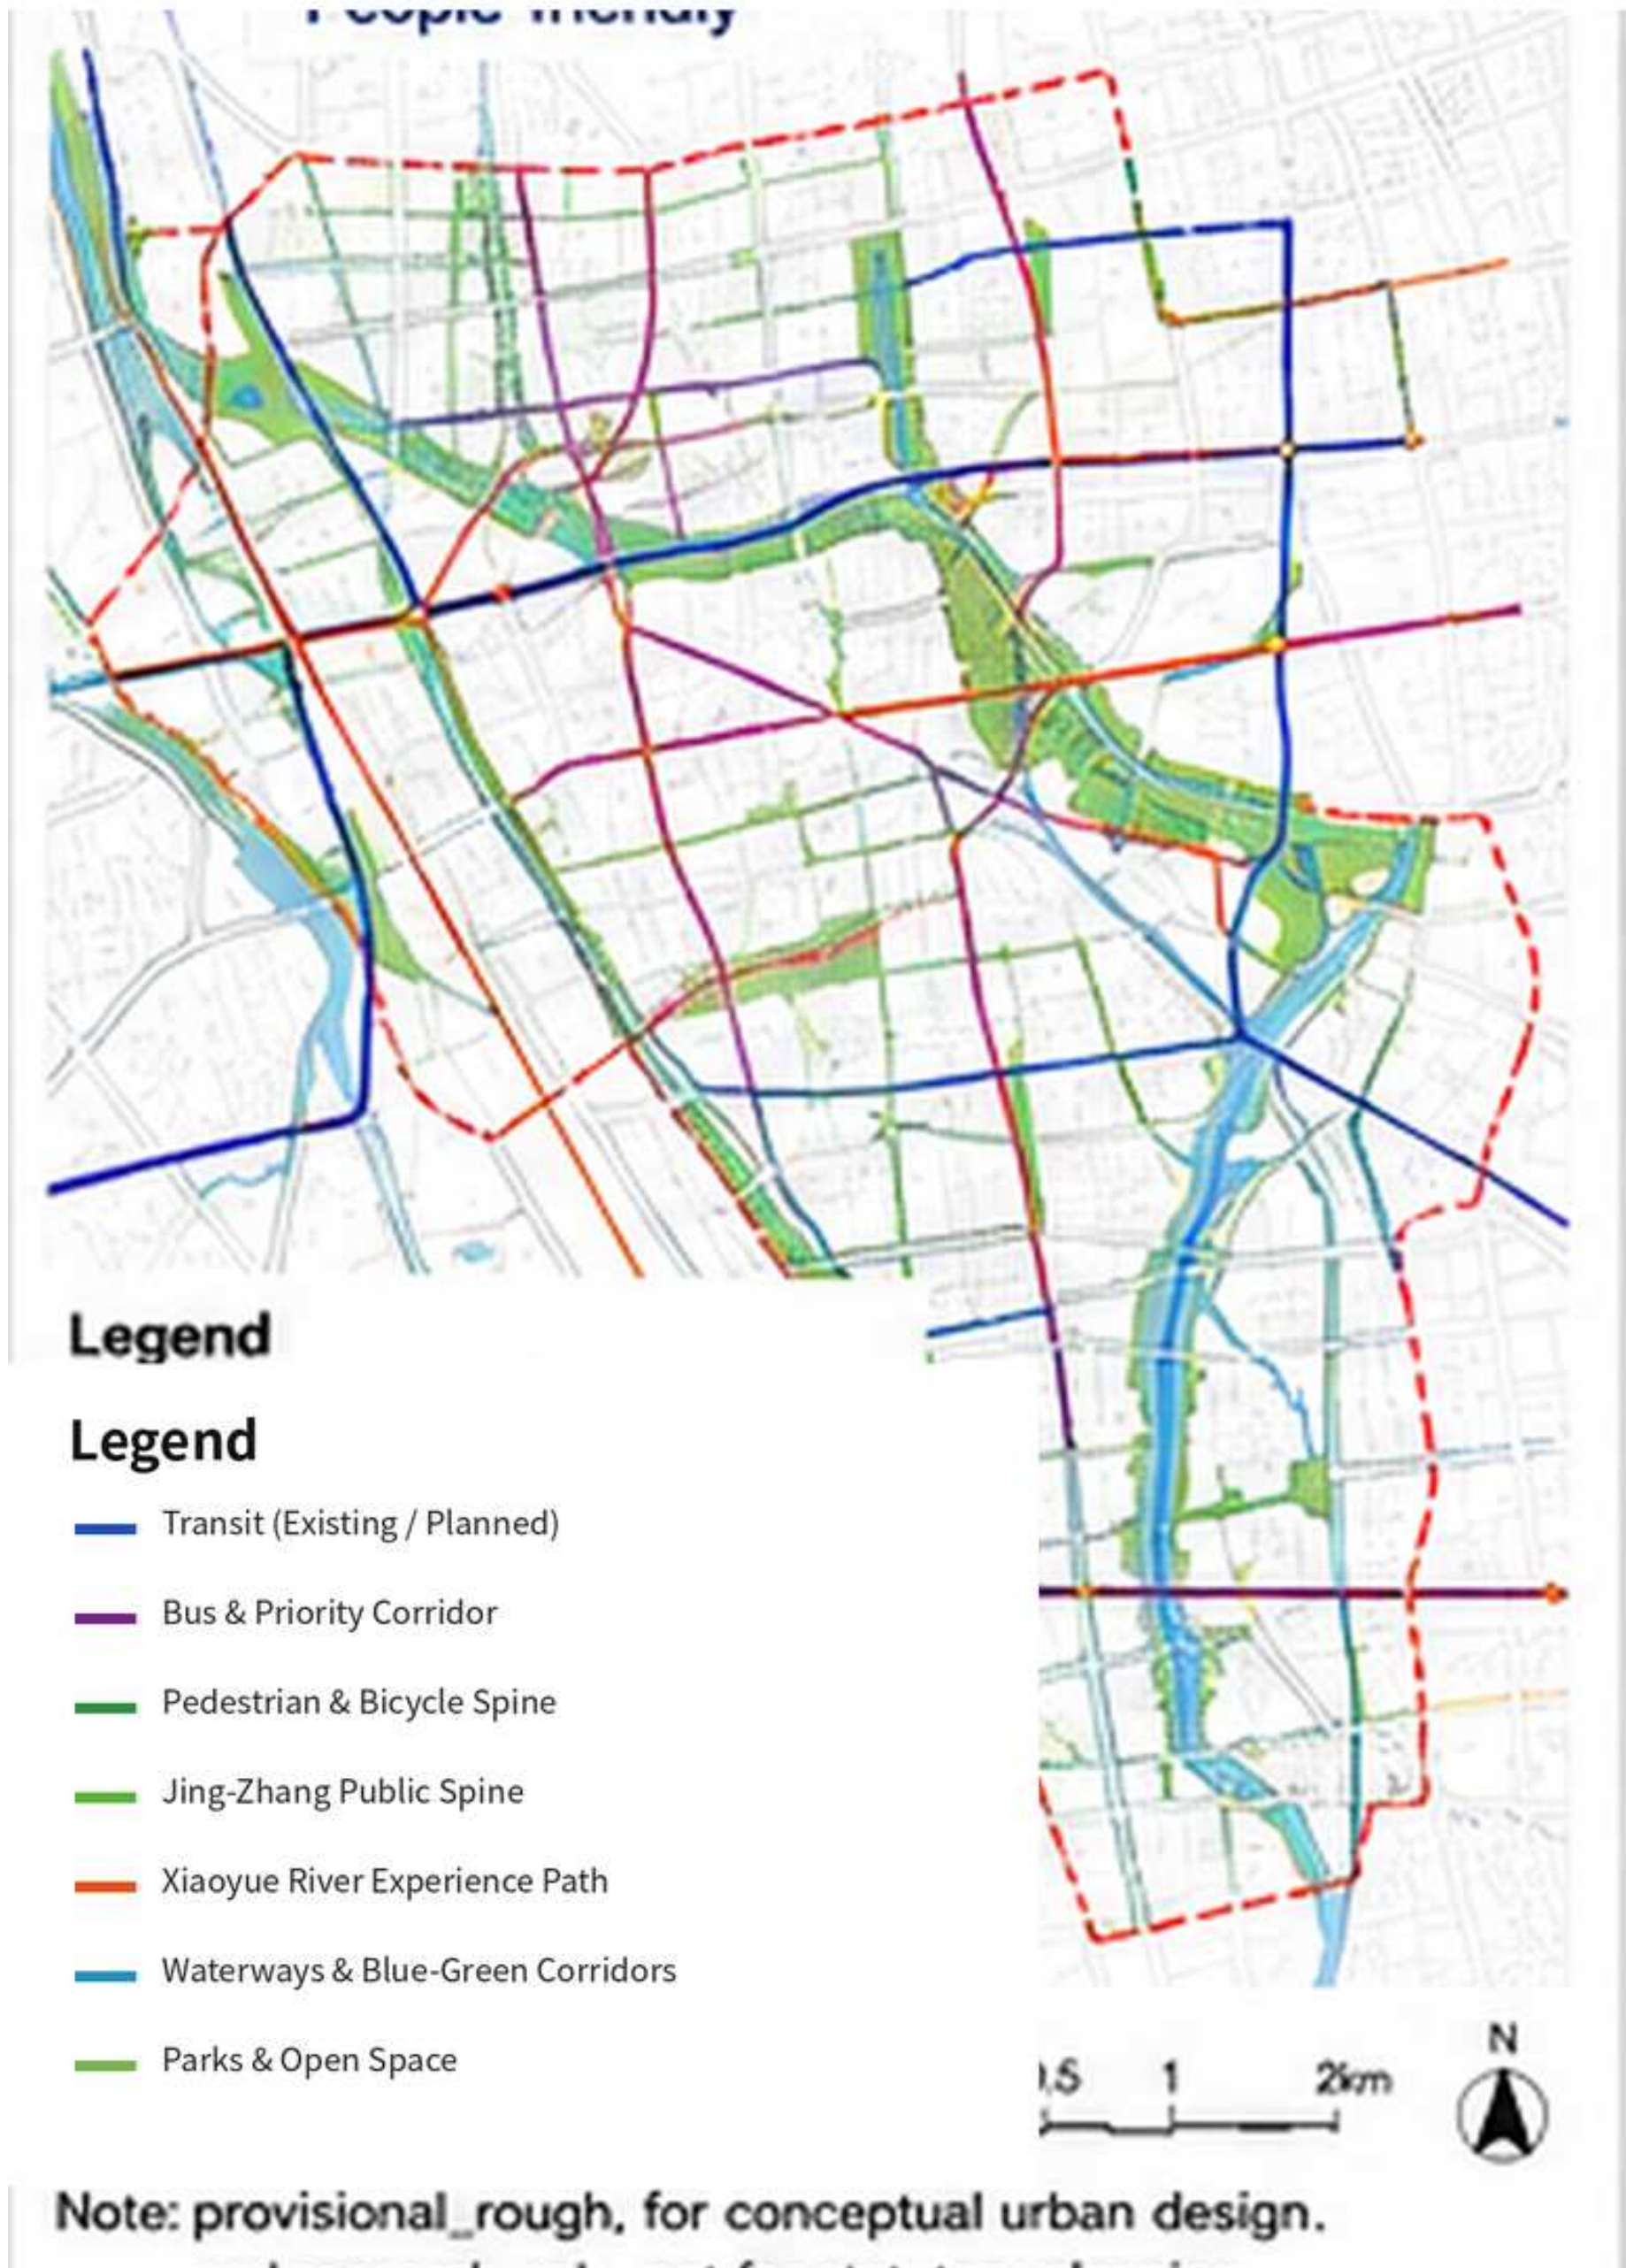

Note: provisional_rough, for conceptual urban design.

Note: provisional_rough, for conceptual urban design and research only; not an official redline or approved

04 Mobility & Blue-Green Network

Multi-network Integration · People-friendly

Note: provisional_rough, for conceptual urban design and research only; not an official redline or approved

05 Metrics & Evidence

Only confirmed scope, deliverable counts and method-level indicators

Space & Scope

Coordinated research area: 43.6 km²
Overall design area: approx. 11.4 km²
3 key areas, approx. 368.4 ha total

Scenarios & Personas

12 AI scenario cards
4 test / validation scenario types
8 persona groups

Public Nodes

3 core honor nodes
1 supporting shared field
Services: AI / HUMAN / OFFLINE / LOW-NO SENSING

Infrastructure Support

C: regional–district–edge compute matching
P: Protected / Flexible / Migratable
W: W0–W3 compute–water coordination

Planning Rules

Civic AI Overlay: 7 object families
A / B / C: mandatory / conditional / guidance-experimental
No fabricated FAR, height, MW, MVA, water demand or pipe size

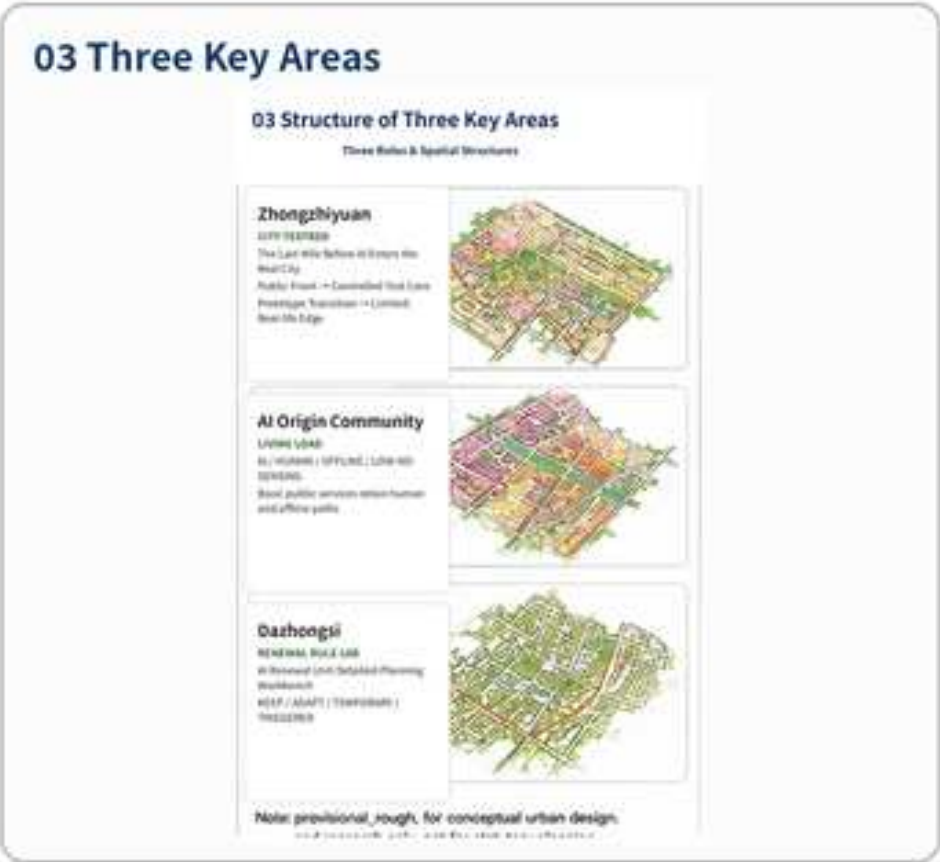

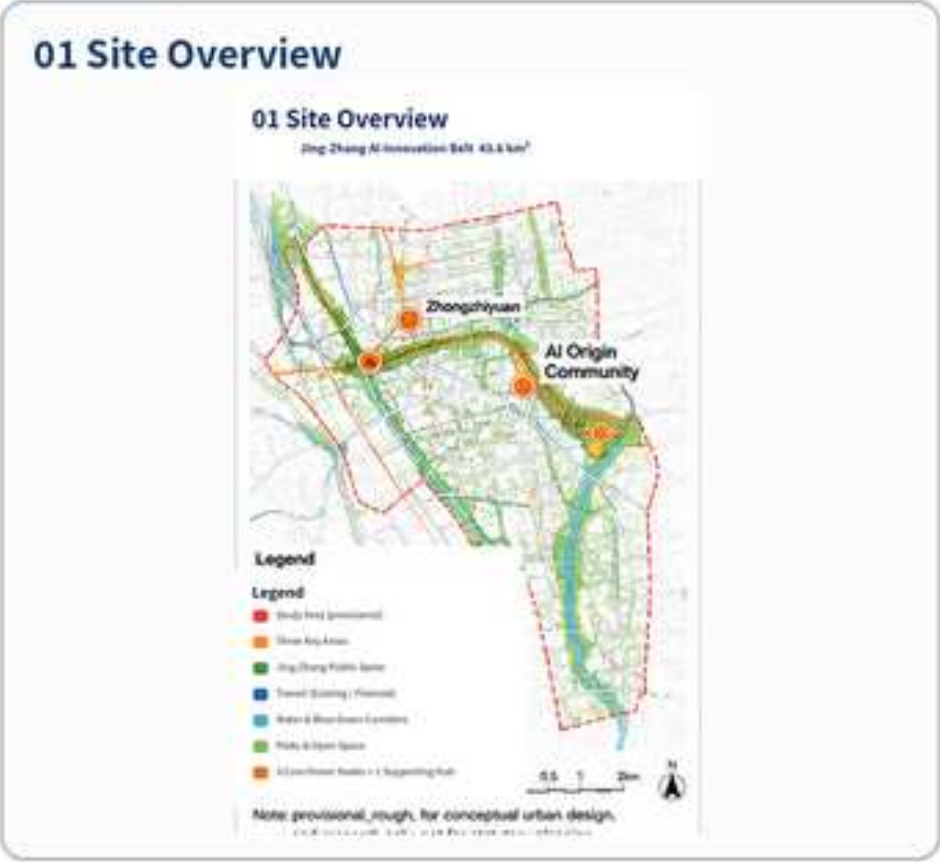

Operations

C0–C6 commissioning method
Evidence Ledger
NORMAL / DEGRADED / MANUAL / EXIT

Note: Numbers shown are confirmed competition scope or proposal deliverable counts, not statutory controls, eng

Jing-Zhang City Commissioning Belt | Visual Pack

Urban Design Core → Civic AI Overlay → AI Infrastructure Support (C/P/W) → C0-C6 Operating Method

All spatial boundaries are provisional_rough; not official redlines, statutory controls or engineering capacity commitments.
